Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 6,575,006 to Don in view of U.S. Pat. No. 2,778,667 to Young.

Don '006 teaches Applicant's claim limitations including : a "sleeve disc" - 49, having a "first wall", "second wall", "third wall" analogous to the presently-disclosed invention, a "rotative tube" - particularly including 44,45,47 as they form a single body in their assembled position, a "torsion spring" - 48, a "guard ring" - 50. Although the parts 44,45,47 are separately formed, they operate as a single part in their assembly. Young '667 discloses that it is well known in the art to manufacture similar structure (2) as a single part. It would have been obvious to one of ordinary skill in the art at the time of the invention to replace parts 44,45,47 with a single part shaped and arranged to perform the same function since it has been held that forming in one piece an article

which has formerly been formed in two pieces and put together involves only routine skill in the art. *Howard v. Detroit Stove Works*, 150 U.S. 164 (1893). One of ordinary skill in the art would have more than a reasonable expectation of success since prior art explicitly discloses that similarly-shaped assemblies can be made in one piece.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 5,125,696 to Robida.

U.S. Pat. No. 5,666,833 to Gao.

U.S. Pat. No. 5,887,465 to Shen.

U.S. Pat. No. 6,383,602 to Lan.
